# *Revised Notice of Public Hearing*

---

September 25, 2008

Ref. 2008-H-14  
Revision 1

The Canadian Nuclear Safety Commission (CNSC) announces a new date for the hearing to consider the *Environmental Assessment Track Report* (Track Report) regarding Cameco Corporation's (Cameco) proposal for the Vision 2010 project, which involves a redevelopment of its Port Hope Conversion Facility located in Port Hope, Ontario. The Commission will also consider the *Proposed Environmental Assessment Guidelines* (EA Guidelines). The proposal is being reviewed as a comprehensive study under the *Canadian Environmental Assessment Act*.

The public hearing will take place on November 6, 2008 instead of October 8, 2008, as originally announced.

**One-Day Hearing: November 6, 2008**

Place: CNSC Public Hearing Room, 14th floor, 280 Slater Street,  
Ottawa, Ontario

The public hearing will be webcasted live via the CNSC Web site. Public hearings follow the agenda published prior to the hearing date.

The project consists of decommissioning and demolishing approximately twenty old or underutilized buildings. Three of the twenty buildings that will be decommissioned are Class 1B nuclear facilities used to refine or convert uranium with a capacity of more than 100 tonnes per year. On-site plant operations would be maintained while the work is being carried out.

A draft version of the EA Guidelines has been previously issued for public comment between March 5 and April 11, 2008. The revised EA Guidelines, taking public comments into account and the Track Report are available by contacting the Secretariat at the address below. Following the hearing, the Commission will report to the Minister of the Environment and make a recommendation on whether to continue with the environmental assessment as a comprehensive study, or to refer the project to a mediator or review panel.

As per the Notice of Public Hearing issued on August 1, 2008, the public was invited to comment on the proposed Track Report and the EA Guidelines. Requests to intervene had to be filed with the Secretary of the Commission by September 8, 2008.

Agendas and information on the hearing process are available at the CNSC Web site: [www.nuclearsafety.gc.ca](http://www.nuclearsafety.gc.ca). CNSC staff's recommendations and hearing submissions are not available on-line and must be requested through the Secretariat at the address below:
