

1 This period will permit completion
2 of a screening report for this facility in
3 accordance with the requirements of the Canadian
4 Environmental Assessment Act. The screening has
5 been required because of a request by the licensee,
6 Cogema Inc., to obtain approval for an increase in
7 the ore extraction limit specified in a licence for
8 the mine.

9 That completes my statement.

10 THE CHAIRPERSON: Thank you.

11 The Commission will take this under
12 consideration in terms of this request. If the
13 Commission agrees to adjourn the hearing to the date
14 specified, ie. Day 1 being June 28th and Day 2,
15 August 9th. That would require that the hearing
16 would be held here, in these offices on June 28th.

17 However, in order to meet the 30-
18 day deadline, that would require that the deadline
19 for filing of materials by both the staff and the
20 applicant is May 29th which is today. I would like
21 to note that, and that July 10th would be the
22 deadline for filing for intervenors for Day 2 which
23 would be August 9th.

24 On that basis, this is the end of
25 the public hearing on the request for adjournment of

1 the application for the renewal of the operating
2 licence for McClean Lake Facility.
