Hello,

Comments on SMRs, etc.

Canada and the planet do NOT need nuclear power plants, including the Small Modular (Nuclear) SMRs or the deadly nuclear waste they produce. Since no person or country has a safe, reliable, sustainable method of storing the nuclear waste we have already produced – why would you want to produce more of it?

I do NOT want my tax or pension money used to subsidize these horrific, deadly, dangerous and unnecessary machines. On the other hand, the Canadian Government has permission to use my money to subsidize and support the development of safe, clean and renewable energy sources and systems.

We do NOT need uranium for anything – leave it in the ground!

I will continue to protest any and all continuation and/or expansion of the nuclear and uranium-mining industry as long as I am physically and mentally able.

Thank you for the opportunity to send you my comments.
