Written submission from Natasha Vaney

In the Matter of

Ontario Power Generation Inc.,
Pickering Nuclear Generating Station

Request for a ten-year renewal of its Nuclear Power Reactor Operating Licence for the Pickering Nuclear Generating Station

Commission Public Hearing – Part 2

June 2018
Submitted by email on May 6, 2018

It is time to remind our government that people vote not corporations.

The **Liberal** Government has been making backroom deals and misspending our tax money on scandals like Oakville natural gas plant at our expense of billions of dollars. We have diesel trains, not electric, they have sold our controlling shares to private corporations in a publicly owned company by taxpayers without public discourse or consent, allowed fracking in Ontario to contaminate our water supply and poison us silently, Nuclear plants that sit on the shores of Lake Ontario, there will be no plan that can safeguard us from a nuclear disaster and history has proven this to be a very bad idea.

Lake Ontario has a fault line the government doesn't want you to know, they are legislating behind closed doors making secret deals at our expense.

Ms Wynne took credit for the closure of the coal-plants but she had nothing to do with it. She has allowed Fracking in Ontario, pick your poison choke to your death or have the soil/habitats and water contaminated by nuclear energy waste and disaster and fracking for natural gas. It is time to vote for a government that understands people vote, you are in your job, that is right your job paid by us the taxpayers.

The Liberal government needs to understand that this election we can vote you out of your job, out of your office, and vote for a government that will put public safety first and will protect all habitats for all species on this planet. Vote for the party that will listen to the public and not make backroom deals, cost us the ratepayers billions with no accountability, we are on the hook.

We can vote to lower our energy costs, we can vote to clean and renewable energy, and we can vote to take back our company Hydro One and its supply of energy so it isn't tied in with fossil fuels and nuclear energy sources.
Make your vote count. Vote for a Green Ontario, vote to lower our carbon emissions not increase it. The true cost of nuclear is too high verse other sources of clean green energy. Even if we turned off the nuclear plants today so we aren't giving away energy to our friends south of the border for FREE at your expense the taxpayers. It would be better economic than keeping the plants open, it is a ticking time bomb. Our nuclear threat is within not some outside source. #greenpeace, #GreenParty, #LiberalParty

Best,

Natasha Vaney
