Dear Mr. Sigouin:

Major Component Replacement:
Update on Bruce Power Posting of Anticipated Waste Volumes

The purpose of this letter is to provide an update on the request to publicly post on Bruce Power's website the anticipated Major Component Replacement (MCR) Program nuclear waste volumes, per Reference 1.

The requested information will be posted to Bruce Power's public domain internet site by March 29, 2019. Estimated volumes of low and intermediate level nuclear waste associated with the six planned MCR outages, to be received and stored at OPG's Western Waste Management Facility on the Bruce Power Site, will be provided. The waste volume information will be reviewed and updated on an annual basis in the month of March each year and the posting will be updated no later than March 31.

If you require further information or have any questions regarding this submission, please contact Rob Harrison, Section Manager, Waste Management and Reduction, at 519-361-2673 extension 15541, or rob.harrison@brucepower.com.

Yours truly,

Maury Burton
Senior Director, Regulatory Affairs
Bruce Power
