

Notice of Hearing

March 18, 2014

Ref. 2014-H-100

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in March 2014 to consider the request from Atomic Energy of Canada Limited (AECL) to operate the Fuel Packaging and Storage (FPS) Facility at the Chalk River Laboratories (CRL), located in Chalk River, Ontario.

The construction of the FPS facility was approved by the Commission in 2009 and AECL has now completed its construction. Commission approval is required before AECL can operate any new Class I nuclear facility at the CRL.

The Commission has determined that a public hearing is not necessary to consider this request from AECL. The hearing will be conducted by way of written submissions from CNSC staff and AECL.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC website at nuclearsafety.gc.ca and made available to the public.

The hearing submissions are not available online and must be requested through the Secretariat at the address below:
