

Notice of Hearing

January 14, 2016

Ref. 2016-H-100

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in January 2016 to consider an application from Canadian Nuclear Laboratories Limited (CNL) to amend the Nuclear Research and Test Establishment Decommissioning Licence for its Whiteshell Laboratories facility, located in Pinawa, MB.

CNL's application proposes to amend the licence using the updated licence format with an associated Licence Conditions Handbook. The updated licence would replicate the requirements of the existing licence.

The Commission has determined that a public hearing is not necessary to consider this application. The requested changes are administrative in nature and do not raise matters related to health, safety or environmental protection that would warrant being considered in a public hearing. The Commission will consider written submissions from CNL and CNSC staff.

The submissions are available by sending a request to the Secretariat at the coordinates below.

Following the deliberations in a closed session and decision of the Commission on this matter, a *Record of Proceedings, Including Reasons for Decision* will be published at nuclearsafety.gc.ca and made available to the public upon request.
