Subject: J.M. Cuttler comments RD-337 version 2, Design of New Nuclear Power Plants

To: Canadian Nuclear Safety Commission

Thanks for your July 26, 2012 invitation to comment on draft regulatory document RD-337 version 2.

I reviewed this draft document and found it to be a significant improvement, in general, over the previous version that was published in 2008. However, there are sentences that require further improvement, which I have identified.

My comments are marked by hand on the attached pages, which I extracted from the full document. I have no comments on the other pages in this document.

Sincerely,

Jerry Cuttler, DSc, PEng
