Subject: comment on CNSC SMR Guide
Date: November-21-18 8:52:02 AM

To whom it may concern,

This is our feedback on comments the CNSC has received on its draft regulatory guide for Small Modular Reactors (SMR):

1. SMRs must not be exempt from environmental assessments.
2. **We agree with and reiterate the comments made by CELA:** <https://bit.ly/2BkK5pM>
3. The CNSC shouldn't be lobbying to exempt SMRs from environmental assessment.
4. Proponents of SMRs must have extensive plans for dealing with radioactive waste before building an SMR.
5. SMR industry must be required to be open and transparent.

Yours sincerely,

Tony Reddin & Marion Copleston,
