Ref. 2020-H-01

My name is Patricio Martinez, I live in the neighbourhood of Lansdowne and Dupont, which is only a block away from the BWXT factory, were they produce 700 tons of uranium polluting the air and the water around us.

If we knew that was there before we moved in the area, we probably wouldn't have bought it. Nobody told us, and I drive by everyday until we recently found out that was a uranium plant in our neighbourhood.

We have kids and they are small and this affects everyone, even our real state because of this dangerous plant meters away from our apartments.

People have the right to know this is there before they move in, they are building a whole neighbourhood right in front of it and I'm pretty sure all this people that bought those new townhouses and new apartments don't even know BWXT is there.

We can't believe that we have an uranium plant in the middle of the city how is that even possible? this is super dangerous and the government needs to stop it NOW!!!!

I demand to know what would happen if the hydrogen tank exploded, I do not want assurances that the chances are low I want to know exactly what the damage to our community would be.

I demand to know if BWXT is insured or not, they claim they are insured but that information is proprietary, I demand to know the name of the insurance company and what the policy covers and what dollar figure their liability is.

I do not give consent to BWXT and The Canadian Nuclear Safety Commission to allow a renewed licence for BWXT.

BWXT, please leave our neighbourhood.

I will only be participating in a written form.

Patricio Martinez
