**Subject:** Bwxt intervention.

Please accept my objections to the new permit for Peterborough.

the largest problem i see is that an extremely large hydrogen tank will be placed within an area that is known to contain undocumented toxins in addition to ones that are documented. asbestos and PCB's airborne in a residential site as a result of an explosion. it would be terribly short sighted to ignore the risk and cost to community. the tiny cancer causing particles are a nightmare on its own. why would you even consider this?

my whole hearted objection to the bwxt licensed should be understood and communicated in discussions as my representative in this place Peterborough Ontario Canada.

Nuclear is not clean
