Re: Cameco Fuel Manufacturing's licence renewal application (Nov 23-24, 2022, Hearing)

Dear President and Commission Members,

Hello

I am writing in support of CFM's 20-year licence renewal request. I have worked at the Port Hope CFM plant for 19 years, and I can confidently say it is the safest place I have worked in my 40 working years of my life. CFM has continued to grow its safety culture over the years, and it is evident to me that safety and our environment is our priority number one.

Cameco Corporation, CFM senior management, supervisors, and employees, genuinely care about our community and co-workers. All of us are encouraged to bring any safety / environmental concerns to management using several ways, formally or informally.

I believe the 20-year renewal along with the added production increase is not an unreasonable request as all safety measures and regulations will continue to be monitored with frequent audits and or inspections, by means of our own internal, our head office, our customers and the CNSC to name a few.

Please consider my recommendation as you can see, I'm a long-term employee working at the Port Hope CFM plant and have first-hand knowledge of our safety and environmental accomplishments.

Regards

Colleen Polley
