Application to Renew the Class IB Nuclear Fuel Facility Licence for Cameco Fuel Manufacturing Inc. in Port Hope, Ontario

Demande de renouvellement du permis d'exploitation de l'installation de combustible nucléaire de catégorie IB pour Cameco Fuel Manufacturing Inc. à Port Hope (Ontario)

Commission Public Hearing

Audience publique de la Commission

November 23-24, 2022

23 et 24 novembre 2022

October 7, 2022

To Members of the Nuclear Hearing Committee

I have been the Occupational Health Physician for Cameco for the last twenty-two years and it has been a privilege to have been a part of the medical team for all of this time. I have written to you in the past during license renewals surrounding Cameco's leadership in health and safety at its Peter Street site.

Since the last reviews this site has taken on a leadership position surrounding COVID-19 with a strong educational component, on-site testing and vaccinations of employees and an out-reach program for family and community members that's been unique in vaccinating close to five hundred non-employees in the community.

Although Beryllium is not located on this site, Cameco Fuel Manufacturing has been recognized as a world leader in medical surveillance for Beryllium by the National Jewish Hospital in Denver and has been invited to present at the International Meetings on Beryllium in Savannah Georgia November 14 and 15, 2022.

Cameco continues to recognize Mental Health challenges in the workplace and has provided strong support for the employees especially during the COVID crisis. I work with approximately ten companies in Canada and Cameco consistently has been and continues to be the upmost leader as it relates to both the physical and mental environment for out employees.

My first strong letter of support for Cameco was over 10 years ago. My views of this company are even more strongly positive today then they were in the past reports.

Thank you for your consideration.

Sincerely

Dr Robert Neville MD CCFD CPOM
