Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent/grandparent concerned about the future of my children/grandchildren and leaving them with legacy radioactive waste.

I'm have always been concerned about radioactive emissions in the event of an accident or target!

I think a 5 year license is long enough. Otherwise people whose experience and judgement cannot be contributed ever again, if the next hearing is in 2047.

25 is a ridiculous long time with no public input! A lot can change in 25 years!

Wages paid at this facility are to high and carries a debt of \$3.6 billion, which is very concerning.
