RE: NB Power application for renewal of its Nuclear Power Reactor Operating License at Point Lepreau Nuclear Generating Station

To Whom It May Concern,

The Construction Association of New Brunswick (CANB) is pleased to once again provide support for the renewal of NB Power's Nuclear Power Reactor Operating License at the Point Lepreau Nuclear Generating Station.

It is our opinion that Point Lepreau staff operate the nuclear generating station to the highest standards of safety and security, as demonstrated by the station's outstanding safety and operational record.

Several of our members work with NB Power to ensure the existing infrastructure in the station remains safe and sound, so it continues to operate safely today and can support clean energy production for New Brunswick well into the future.

The energy produced at Point Lepreau is an important contributor to the heavy industrial activity that takes place in Saint John, in addition to supporting economic activity throughout the Maritimes. Without the electricity generated by this facility, CANB is concerned that the energy required for industrial and economic activity would fall short.

Taking into consideration safety, security, energy development and economic activity, we fully support the renewal of NB Power's Nuclear Power Reactor Operating License at the Point Lepreau Nuclear Generating Station.

Sincerely,

John-Ryan Morrison
Executive Director
Construction Association of New Brunswick
