Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am an older person whose experience and judgement cannot be contributed ever again if the next hearing is in 2047. I am concerned about nuclear and how climate change may impact the facility. As a grandparent, I am deeply concerned about radiation emissions in the event of an accident. I am also very concerned about 1. the effects on the ecology of the Bay of Fundy from any possible leaks from the system, and 2. the very real possibility of an earthquake that could cause fractures or a meltdown.

Please acknowledge receipt of this email.

Sincerely,

Rose Doucet

Baxter's Corner, NB
