Subject: Renewable alternatives to Nuclear power.

To whom it may concern, now that's an interesting opener for common sense, and excellent stewardship for power in NB!

No, to a gag for 25 year's, no to nuclear power implementations in NB, period!

Shame on you for this incredibly outdated, pathetic and dangerous suggestion!!!

If we have to drag you into the 21st century, that can be done too.

Come on guys! (I know no girls are involved in this insanity). 😏 Step! REALLY make a difference here, stop being the sheep, and start being a shepherd.

Yours sincerely,

Lynne Kennett-Read. Recently retired RN of 46 years! Tell me you get it, to why I signed off as I have, right?
