Subject: LePreau Generating station permit

Hi, I am a concerned resident of NB . I have heard the usual 5 year renewal will be extended to a 25 year term. I am a home owner, and I know that a lot can happen in such a long period of time. I wonder if safety is being sacrificed for savings.

It is also a concern that we are not putting enough planning and research into renewable energy. Recent events in Europe should serve as a warning- reliance on foreign fuel and nuclear plants that can be used as weapons are two good reasons to strive for green solutions.

I do not wish for the Point LePreau reactor to be given this extension- I would think the older stations should be tended to more closely. I strongly wish for tax dollars to be invested in wind and solar power, with incentives for regular citizens to go off-grid.

Thank you, Sincerely,

Dawn Mockler

Fredericton, NB
