Subject: Intervention PLNGS Hearing Ref. 2022-H-02

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the license renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am an older person whose experience and judgment cannot be contributed ever again if the next hearing is in 2047 ;and I am very concerned about the future of my children ; grandchildren and great-grandchildren, leaving them with legacy radioactive waste.

I am very concerned about radioactive emissions in the event of an accident.

Also I am member of the public concerned about nuclear, and how climate change may impact the facility, and concerned about the adequacy of emergency planning and awareness about emergency response.

In fact, nuclear energy should not even be on the table ; the huge amount of tax dollars spent on this should instead be focused on rapidly creating and using clean ,non toxic, affordable forms of green renewable energy!!!

I am a member of NBASGA, The Council of Canadians , and Cred.NB

Please heed and act on our the letters that have been sent to you in hopes of a survivable future slowing climate change away from any dependency on nuclear or fossil fuels. It can be done if the political will to do so exists!

Please acknowledge receipt of this email; thank you.

Carol A Ring
