Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive waste, a parent concerned about radioactive emissions in the event of an accident and also a parent that is aware of the many other options to generate power without the potential of catastrophic environmental disaster.

I am already thoroughly concerned by some of the current methods of generating such as damming and how they already have drastically impacted our wildlife.

Do we really need to engage in further risky behaviours such as nuclear energy when there are other means of generating power.

Please acknowledge receipt of this email.

Thank you for your time.

Sincerely,

Marley Nickerson (mother and aunt to many small children, lover of nature)
