Hello,

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I'm concerned that 25 years is too long a renewal period. That's an entire generation. Why not a more reasonable period, such as 5 years? What is NB Power afraid of? Do they feel the need to lock in an outrageously long license in order to avoid any accountability to the public concerning such matters as safety and cost overruns?

A 25-year license means that the public will have no say on Point Lepreau for all that time. An entire generation will be silenced.

I urge you to say no to NB Power's unreasonable request for 25 years with no public accountability.

Thank you. Please acknowledge receipt of this email.
