Subject: Intervention PLNGS Hearing Ref. 2022-H-02

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a member of the public concerned about nuclear energy, nuclear waste, and the length of this suggested contract (25 years).

I am **not** in favour of a 25 year contract and would suggest the maximum time for renewal be 5 years in order to assure responsible and transparent workings, and fiscal and environmental efficiency. With the rapid exponential change in technology and worsening weather conditions, having a 25 year contract for the Lepreau Nuclear Power Plant would be irresponsible. Under the circumstances of today, many of the detriments that have always been (accidents on site and at the uranium mining sites, unresolved radioactive waste management, etc.) now includes a legitimate risk of security relevant to the political instability of this day and age. This is not a time to lengthen contracts.

Please do not award a 25 year licence to ensure public safety and corporate responsibility.

Please acknowledge receipt of this email.

Thank you,
Misti Campbell

Saint John, NB
