**Subject:** Name change for Darlington Waste Management Facility

To the Commission and President Velshi,

Nuclear Sustainability Services, Darlington, misrepresents the nature of the facility. It misleads the public into thinking that nuclear energy is as health-safe, cost effective and environmentally friendly as renewables. Therefore, it can be considered “Green-washing”.

I recommend that the license and repairs renewal should be for 5 years only. Nor should the life of the aging Darlington Facility be extended with upgrades and repairs.

As you no doubt know, nuclear energy as we know it today, isn't sustainable and the plutonium contamination of the entire Earth in just 80 years cannot continue, if we value our children and grandchildren. And, so far, we can do nothing to turn this around. We have no completely sustainable method of removing nuclear waste from our environment for the long-term.

Sincerely,

Georgina Bartos
